

**SCHMIDT
TRANSPO**

Turner Diverter

Application:

For turning and diverting of products in one machine.

E.g.: 2x2, 2x3, 2x4, 2x6, 2x8
beverage multi packs.

Construction:

The products are transported on transport carriers, fitted on transport rods. Corresponding to the course of guidance they will be turned and diverted to the relevant output.

Diverted can be in:

- two or more lanes
- turned or unturned

Capacity:

up to 200 packs/min.

Advantages:

- Fully enclosed stainless steel machine frame. Stainless steel and Lexan housing
- Diverting without product stop, therefore high transfer rate
- High transport speed: 200 packs/min.
- Smooth product transport, due to milled guides
- Manual switching block
- Machine hard coupled with universal joint, driven by packing machine. No electronics necessary
- Chain and bearing lubrication
- Easy and fast operation and maintenance
- Designed to suit customers requirements
